FIELD CARD

Maryland/DC Breeding Bird Atlas Project 2002 through 2006

Welcome to the Breeding Bird Atlas Program of the Maryland Ornithological Society, Inc.

This card is for your use in the field and for computer entry. For each species please enter the code for the highest category observed, and if CONFIRMED give the date of that observation. Also, if your block is subdivided into quarter-blocks, mark each quarter-block in which the species was found. Please return this card to your county coordinator by September 1.

BREEDING CRITERIA & CODES

POssible
- O Observed but not in breeding habitat
- X Heard or seen in breeding habitat

PRobable
- A Agitated behavior or anxiety calls
- P Pair seen
- T Bird holding territory
- C Courtship or copulation
- N Visiting probable nest site
- B Nest building by wrens or woodpeckers

COnfirmed
- DD Distraction display
- NB Nest building
- UN Used nest
- FL Recently fledged young
- FS Parent with fecal sac
- FY Parent with food for young
- ON Parent leaving/entering nest site or on nest
- NE Nest with eggs
- NY Nest with young
