

MD/DCRC Database Abridged Version

District of Columbia

30 November 2011

MD/DCRC Database Status & Decision Definitions

**Decision/Status**

**Definition**

**S&R**

Sight records from the committee's baseline document: Stewart & Robbins, The Birds of Maryland and the District of Columbia, 1958.

**DCRC**

Records from the (defunct) DC Records Committee baseline.

**Accepted**

Reports accepted by the committee.

**Accepted-Group**

Reports accepted only as to a species group or genus--where all other species of this group are reviewable at the observed location.

**Not Accepted**

Reports not accepted by the committee.

**Circulating**

Reports currently in circulation and under review by the committee.

**Recirculate**

Reports where no committee decision was reached during the latest circulation. The report will be circulated again.

**Ready**

Reports ready for circulation. All relevant reports, or a sufficient number of reports, have been submitted.

**Reviewable**

Reports of a species/location that meets the committee's Review List criteria. Additional observer data is believed to be outstanding.

**USNM**

Reports of specimens in the US Museum of Natural History that have not otherwise been published. Specimens are to be verified and reviewed by the committee.

**Unreviewable**

Reports with insufficient descriptive identification details to permit a review by the committee. Typical for many older published sight records.

**Research**

Apparently unpublished reports - investigation in process to determine if documentation exists.

**Retracted**

Published reports - subsequently retracted by the observer(s).
