

MD/DCRC Database Abridged Version

Maryland

3 February 2017

**Note:** This version of the MD/DCRC's MD database contains only the basic data fields associated with each report or record. The full database contains much more information. Please contact the MD/DCRC Secretary regarding detailed data queries.

This version of the DC database conforms to the 2016 57th Supplement to the AOU Checklist:

MD/DCRC Database Status & Decision Definitions

Decision/Status

Definition

Accepted

Reports accepted by the committee.

Accepted-Form

Reports accepted as an unusual subspecies or form for the region.

Accepted-Group

Reports accepted only as to a species group or genus--where all other species of this group are reviewable at the observed location.

Circulating

Reports currently in circulation and under review by the committee.

ID OK?? Origin

Reports accepted for the species/group reported, however, the committee questioned whether the bird was a "natural" vagrant or a "wild" bird.

ID OK/Exotic Origin

Reports accepted for the species/group reported, however, a majority of the committee felt the bird was of exotic (i.e., captive) origin.

Not Accepted

Reports not accepted by the committee.

Ready

Reports ready for circulation. All relevant reports, or a sufficient number of reports, have been submitted.

Recirculate

Reports where no committee decision was reached during the latest circulation. The report will be circulated again.

Retracted

Published reports - subsequently retracted by the observer(s).

Reviewable

Reports of a species/location that meets the committee's Review List criteria. Additional observer data is believed to be outstanding.

S&R

Sight records from the committee's baseline document: Stewart & Robbins, The Birds of Maryland and the District of Columbia, 1958.

Unreviewable

Reports with insufficient descriptive identification details to permit a review by the committee. Typical for many older published sight records.
